

Exciting student job for .NET development

About us

AWM Network is an innovative company providing online services that helps people find suppliers, compare offers and save time when purchasing products within the financial market, green energy industry, business-to-business sector and several other trades. We are looking for a bright and passionate software developer to join our IT-team and contribute to this effort.

AWM Network was founded four years ago and we have been taking market shares rapidly. Today we are counting 30+ employees - a number which is growing fast. We consider ourselves to be highly ambitious while also putting a strong emphasis on a good and healthy work-life balance and a friendly and comfortable working environment!

Here are a few examples of the websites we run: www.market-inspector.co.uk, www.greenmatch.co.uk, www.lånio.dk

Job description

As a software developer at AWM Network you will contribute to the development and operation of our enquiry distribution system which plays a central role to our business. You will become familiar with our entire development stack and work on a broad variety of tasks. Examples of tasks include implementing feature requests from our colleges in other departments and integrations to our partners' systems. Additionally we continuously work on ensuring our code base is easy to maintain, test and expand upon.

You will be part of an IT-team consisting of four competent and friendly developers who will support your personal development and welcome your ideas. The software we are developing is for inhouse use which enables us to have a close collaboration with our end-users and maintain a short development cycle. We have an agile mindset and are following agile principles while constantly seeking to optimize and automate our work processes. You will be working with the following technologies:

- C#
- ASP.NET MVC
- HTML5, CSS3, JavaScript
- Umbraco CMS
- Microsoft SQL Server
- Amazon AWS

Qualifications

You are on your Bachelor's or Master's degree within software development. Additionally, you enjoy learning and are not afraid of challenges. You must have a structured and responsible approach towards work and be able to work both individually and in teams. Finally, you need to be proficient in spoken and written English.

Terms

You will be working 15 hours a week but we are very flexible in terms of planning around your examinations and other matters. The majority of work will be conducted from our office which is located at Høffdingsvej 34, 2500 Valby. Salary will be negotiated in relation to experience and skill set.

Interested and want to know more?

Enquiries and applications should be send to Kasper Nielsen at kgn@awmnetwork.com

Please include CV and all IT-related examination grades along with your application.

By applying for this position you understand we will process your personal information for recruitment purposes only. As part of the screening process, we may gather more information about candidates by reviewing your social media profiles, including but not limited to Facebook and LinkedIn. When the recruitment process is over, we will either delete your data, or with your consent we will store it in our database for future internship opportunities.
